

Marlon and Deborah Ragin

Marlon and Deborah Ragin have resided in Prince George's County for almost 30 years. Marlon works in the tech field and Deborah is a registered nurse. As the founders and owners we are in control of the type of services that we know our community needs. Our company, Honeycomb Nursing & Concierge Services offers concierge nursing services that include the following: full spectrum doula services (birth, postpartum, lactation, and pregnancy loss), elder care management, post hospital discharge education/support and more. Our goal is to assist in keeping individuals in the comfort and safety of their homes, decrease hospital readmissions, educate, support, improve birth outcomes, and enhance our families. As a health care community worker, Deborah has witnessed what our communities' lack. As an entrepreneur, we are making it happen! Our concierge services are tailored to individual needs. We are not locked in to how, when or why services are rendered. Our services are delivered in a way that is truly impactful.
